Methodology

The survey findings presented in this release are based on the results of interviews conducted between May 29 and June 4, 2007 with 567 adult Pennsylvanians. The interviews were conducted at the Center for Opinion Research at Franklin & Marshall College under the direction of the Poll's Director, G. Terry Madonna, the Poll's Head Methodologist, Berwood Yost, and the Poll's Project Manager, Jennifer Harding. Telephone numbers for the survey were generated via random digit dialing, and respondents were randomly selected from within each household. The sample error is +/- 4.1 for the total sample. Final survey results were weighted to adjust for different selection probabilities and non-response.

This Keystone Poll was done in conjunction with the Harrisburg Patriot-News, Pittsburgh Tribune Review, Philadelphia Daily News, WGAL, and WTAE. It may, however, be used in whole or in part providing any use is attributed to Franklin & Marshall College.

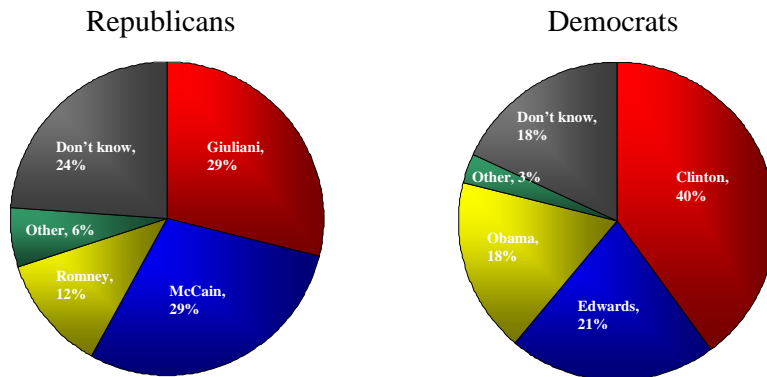

Key Findings

The latest Keystone Poll shows a dead even race for the Republican presidential nomination in Pennsylvania with Rudy Giuliani and John McCain each preferred by about three in ten (29%) registered Republicans. Mitt Romney is a distant third (12%), and one in four (24%) Republicans is still undecided about their preference for a party nominee. At the moment, Giuliani does better among Republican women than McCain, but McCain leads among Republican men (see Table A-1).

The race for the Democratic nomination is not very close at the moment. Hillary Clinton (40%) has a considerable advantage over both John Edwards (21%) and Barack Obama (18%). Clinton holds a commanding lead among female and non-white Democrats, while also holding a comfortable lead among Democrats in the lowest income bracket (see Table A-2).

Figure 1 Pennsylvania 2008 Presidential Primary Preference

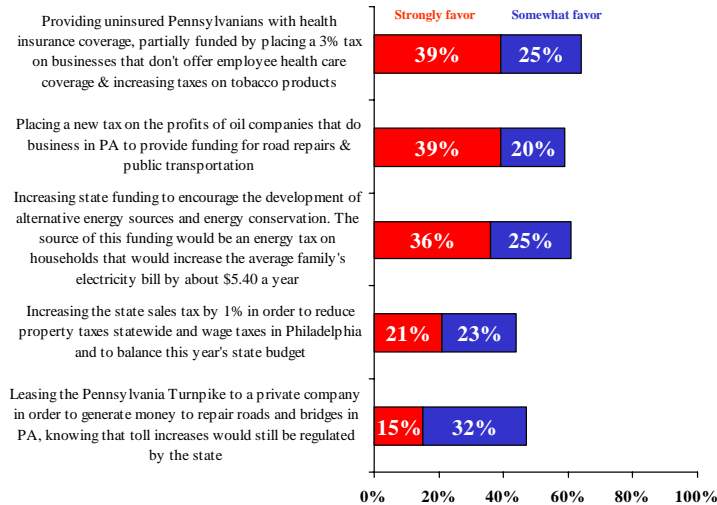

If the 2008 primary election for President was being held today and the candidates included *[fill candidates, rotated]*, would you vote for *[fill candidates, rotated]*, some other candidate, or aren't you sure how you would vote?

The survey shows that Governor Ed Rendell's job performance ratings have declined since February, down from 50% of voters who rated his job performance as excellent or good to 45% today. The performance rating of the state legislature has remained relatively stable since February, now at 26% excellent or good.

The survey also finds substantial public support for several of the Governor's budget proposals (see Figure 2). Most Pennsylvanians favor taxing oil company profits (59%), providing health insurance for uninsured Pennsylvanians (64%), and increasing state funding to encourage the development of alternative energy sources (61%). More Pennsylvanians favor than oppose leasing the Pennsylvania Turnpike to a private company (47% favor versus 40% oppose), but about one in seven (13%) are undecided about that initiative. There is more opposition than support for increasing the state sales tax to reduce property taxes; more Pennsylvanians oppose than favor increasing the state sales tax by one percent (44% favor versus 50% oppose). Support for each of these initiatives has changed little since February.

Figure 2 Support for Selected Budget Proposals

The need for property tax reform in Pennsylvania is a continuing topic of conversation for many, but polling on the topic can yield different results depending on how those taxes will be replaced and how tax revenues will be used. The Keystone Poll asked a simple question about whether citizens favor or oppose the complete elimination of property taxes in the state. One third (32%) of residents favor the complete elimination of property taxes, but half (53%) oppose such a measure.
