# Clinton Leads Sanders by 28%

*(Clinton 61% - Sanders 33%)*

EAST LANSING, Michigan --- Former Secretary of State Hillary Clinton continues to dominate Vermont U.S. Senator Bernie Sanders among likely Democratic Party Presidential Primary voters in Michigan. Clinton leads Sanders 61%-33%, but the margin has dropped 6% since last week, despite Sanders almost 50% loss in South Carolina on Saturday. However, Sanders has been outspending Clinton on TV ads in Michigan, which likely explains Sanders increased support. Only 5% of the voters remain undecided.

The IVR (Interactive Voice Response) automated survey of 427 likely March 2016 Michigan Democratic Presidential Primary voters was conducted by Mitchell Research & Communications March 1, 2016. The poll has a Margin of Error of + or - 4.74% at the 95% level of confidence.

“Hillary Clinton continues to lead Bernie Sanders by a large margin (61%-33%) after her victory in the South Carolina Primary. But, with Sanders spending more on ad-buys in Michigan, he has closed the gap by 6% since last week. Clinton still seems poised to win a big victory in Michigan next Tuesday,” Steve Mitchell, CEO of Mitchell Research & Communications said.

Here are the results by key demographics:

By age:

- Sanders leads Clinton 58% to 39% with 18-39 year olds.
- Clinton leads Sanders 52% to 48% with 40-49 year olds.
- Clinton leads 62%-33% with voters 50-59.
- Clinton leads 65%-29% with voters 60-69.
- Clinton (82%) leads Sanders (16%) with voters 70 and older.

By gender:

- Clinton leads with men 57%-37%.
- Clinton leads with women 71%-26%.

By race:

- Clinton is ahead with white voters 61%-35%.
- Clinton has a huge 84%-13% lead with African-Americans.

By area:

- In Wayne County, Clinton leads 76%-17%.
- In Oakland, Clinton leads 73%-28%.
- In Macomb, Clinton leads 80%-20%.
- In Saginaw, Flint, Saginaw, Bay City, Midland, the Thumb, Clinton leads 63%-35%.
- In Washtenaw, Monroe, Mid-Michigan, Clinton leads 58%-37%.
- In West Michigan, Clinton leads 61%-32%.
- In Northern MI/Upper Peninsula, Clinton and Sanders are tied at 47%.

“Despite the loss in New Hampshire, Clinton remains very strong in Michigan. She has a 40% lead with women, almost 50% lead with African-Americans, and a more than 60% lead with voters older than 70. Michigan should give Clinton a big win on her road to the nomination,” Mitchell concluded.

**Methodology:**

Mitchell Research & Communications used a sample of likely voters in the November 2016 Michigan General Elections. Our goal is to spread as wide a net as possible to assure we survey voters who may not have voted in primary elections before. A quadruple filter was used to determine that we were surveying only likely Democratic Party Primary voters.

- First voters had to say they were registered voters. If they were not, the phone call ended.
- Then, they were asked if they were definitely voting, probably voting, not sure yet, or definitely not voting in the November General Election. If they were “definitely not voting” the phone call ended.
- Then they were asked if they were definitely voting, probably voting, not sure yet, definitely not voting, or if they had already voted by absentee ballot in the March 8<sup>th</sup> Presidential Primary. If they were “definitely not voting” the call ended.
- Finally, they were informed that they could only vote in on party’s primary, not in both. They were asked if they were voting in the Democratic Party Primary, the Republican Party Primary, or if they were not sure. If respondents said “Republican” or “not sure” the call ended, so we were only polling those who said they were voting in the Democratic Party Primary Election.

We asked Mark Grebner of Practical Political Consulting, regarded to be the best list vendor and voter demographer in Michigan, and the person that supplied us with our sample, to give us his estimate on voter turnout by age, gender, and race.

We compared final results to determine if the data needed to be weighed to reflect the demographics of the likely voters. Some weighting was done on age, race, and gender to assure the demographics of those called were consistent with likely voter turnout.

Federal law only permits us to call land lines. Because likely Primary voters are older, 54% are 60 or older and 86% are older than 50, we believe there are sufficient land line voters to get an accurate sample. We do not have to make any assumptions of likely voter turnout.

(In reading Democratic cross tabs the middle number is the correct percentage of vote for each candidate. For example, looking at the row called total, Clinton has 61.4%, Sanders 33.3% and 5.4% are not sure. Among those “Definitely voting, Clinton has 62.4%, Sanders 32.37%, and 5.4% are undecided. Of all respondents, 97.9% are “Definitely voting,” 2.1% are “Probably voting” etc.)
