

GA Presidential Election Survey
Conducted 11/6/16
1250+ Respondents
Likely General Election Voters
Margin of Error: +/- 2.76
Response Rate: 3.54%
Confidence: 95%
Response Distribution: 50%

Overall Survey

Standard Ballot Test

Secondary Ballot Test

Which candidate do you think most of your neighbors are voting for?

Age Ranges

Seniors (62+)

Ages 56-61

Ages 46-55

Ages 36-45

Ages 26-35

Ages 18-25

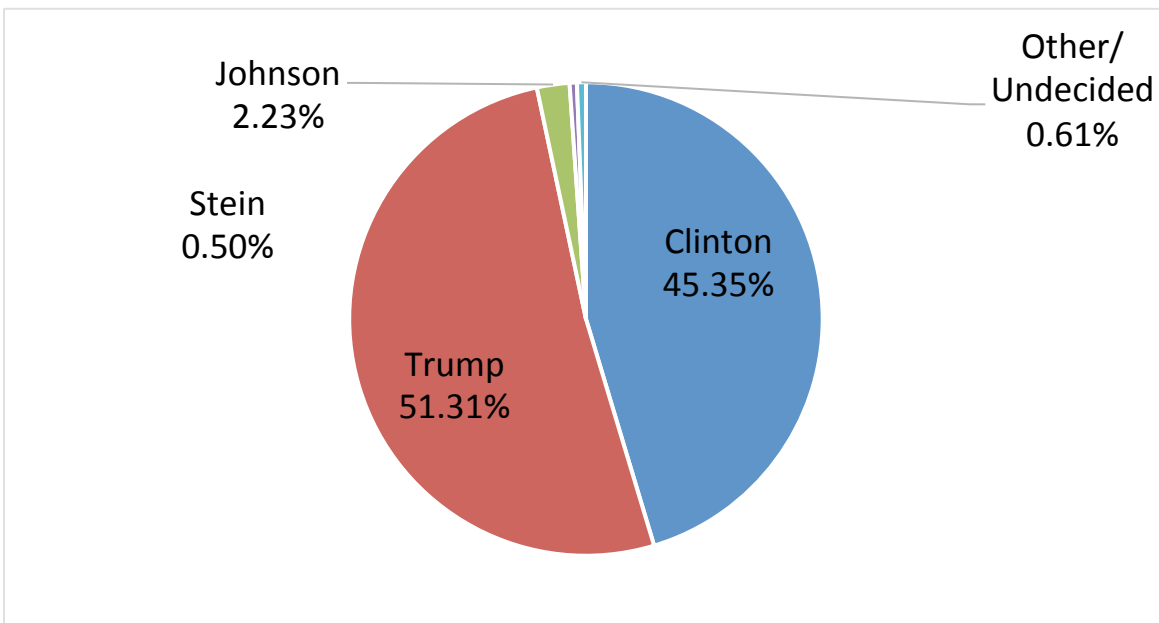

Self-Identified Gender

Self Identified Race/Ethnicity

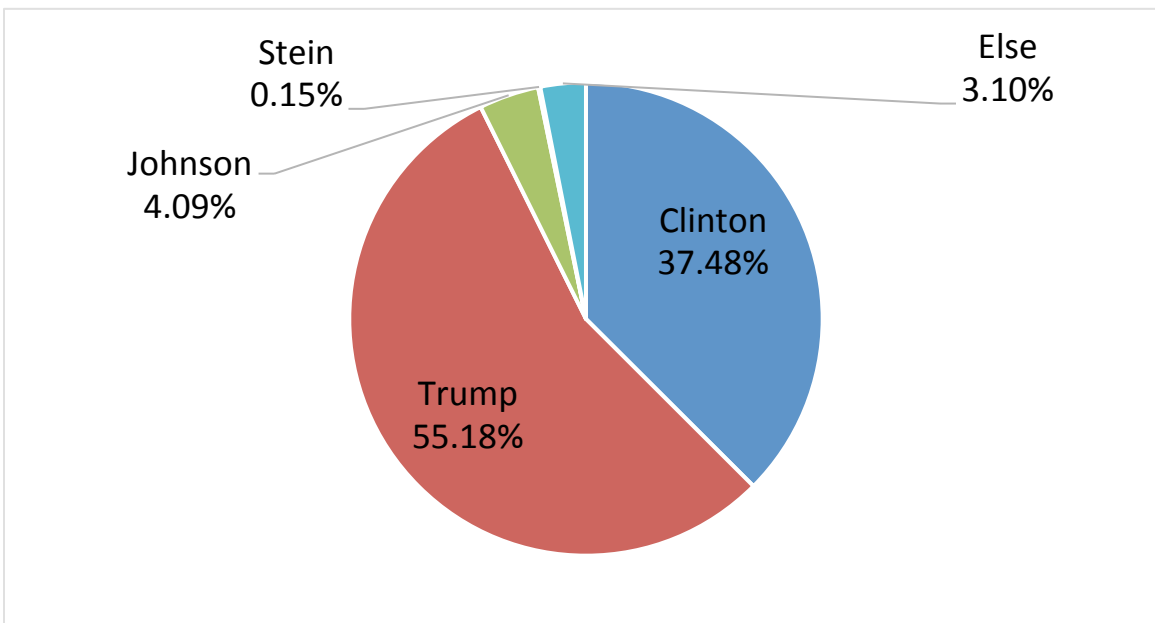

Survey Question #1
Likely voters whose most recent
general election was 2008 and forward

Survey Question #1
Likely voters whose most recent
general election was 2006 and before

Survey Question #2
Likely voters whose most recent
general election was 2008 and forward

Survey Question #2
Likely voters whose most recent
general election was 2006 and before

Methodology

Likely general election voters were selected at random from a list of registered voters based on election participation and registration date. Household ages and locations were extracted as well from this list. In excess of 45,000 households were called over the duration of the poll. Each household participant was asked to opt-in to the survey if they planned to vote in the 2016 Presidential Election.

Using automated voice response technology allows each participant to hear the questions exactly the same way, from the same voice, spoken with the same tone and nuance. Calls are placed to randomly-selected phone numbers through a stratified process that insures appropriate geographic representation. These calls were placed from 10:00am to 8:30pm local time on Sunday, November 6th.

Survey results undergo a weighting process to ensure the sample is comparable to the demographic breakdown of 2012 Georgia general election participants. Final results are based on these weights in order to address non-response bias. In addition, the final published ballot test is a combination of survey respondents to both a standard ballot test and a ballot test guaging where respondent's neighbors stand. This addresses the underlying bias of traditional polling, wherein respondents are not wholly truthful about their position regarding highly controversial candidates.
