This Siena College survey was conducted October 12-14 2022 by telephone calls in English to 707 self-identified likely voters in New York State. Telephone sampling was conducted via a weighted stratified dual frame sample of landline and cell phone drawn from the L-2 database of registered voters. Data was statistically adjusted by region, race/ethnicity, political party, education, statewide vote pattern in the 2020 election, and gender modeled to a composition of the electorate in 2014 and 2018 to ensure representativeness. It has an overall margin of error of +4.9 percentage points including the design effects resulting from weighting. The Siena College Research Institute, directed by Donald Levy, Ph.D., conducts political, economic, social, and cultural research primarily in NYS. SCRI, an independent, non-partisan research institute, subscribes to the American Association of Public Opinion Research Code of Professional Ethics and Practices.
